EXPERIENCE

Dao Proptech — Full Stack Developer (App & Web Platform)

October 2021 - Present

Transforming the **Real Estate** eco system of Pakistan, Dao Proptech optimizes the way people buy, sell, research, manage and market property through cost-based pricing and transparency.

- Designed, Implemented and shipped full stack features for an internal team tool (reducing manual effort by 100%) and for a global investment portal having a rapidly growing user base of 50k+.
- Constructed backend for a cross platform mobile app from scratch (A Booking Application with surge pricing structure) and structured logs for ongoing actions and upcoming requests to increase product efficiency by 50%.
- Continuously worked on product feedback provided by feedback elicitation team to improve/scale core product features/capabilities having a user engagement of 30K+ (WAUs).
- Revamped 3 to 4 backend services for an existing system reducing API response by 30%.

Solis Solutions — Full-Stack Software Engineer

June 2020 – September 2021

A product-based start-up providing services in Blockchain, NFT Platforms and Tokenomics. Specializing in go-to-market and growth strategy solis solutions helps its clients grow through custom application development.

- Re-engineered frontend of an advertisement monitoring tool (web-application) optimizing load time by ~4 to 5 seconds and performance gain of over 100%.
- Led backend effort to prototype additional features/modules and carried out multiple instance's deployments on **AWS VM** running a **Nginx** web server.
- Single handedly build and deployed a Social Media Marketing (SMM) tool (web application) from scratch incorporating Facebook and Instagram Graph Api's.
